

MemorialCare Rehabilitation Institute

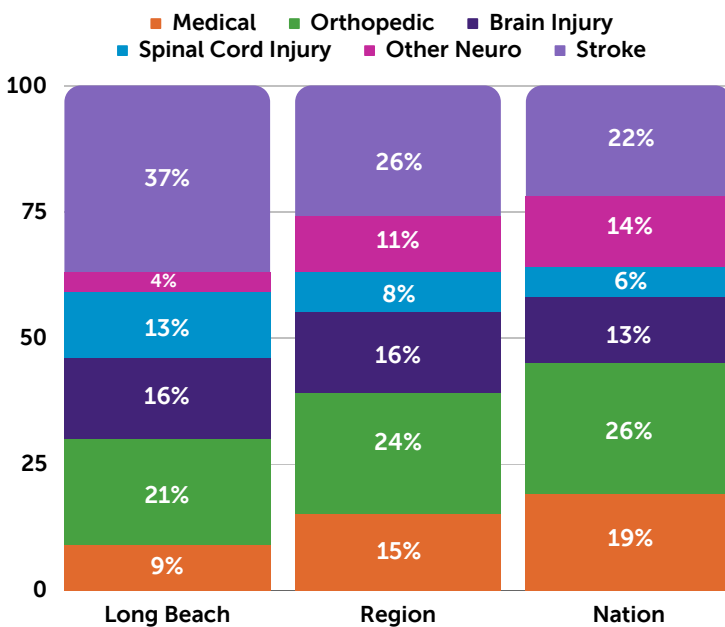

at Long Beach Medical Center

Rehabilitation Services Outcomes - 2022

Stroke | Orthopedic | Brain Injury | Spinal Cord Injury

As a Commission on Accreditation of Rehabilitation Facilities (CARF) accredited facility, the MemorialCare Rehabilitation Institute at Long Beach Medical Center's inpatient rehabilitation program is dedicated to getting patients home quicker and with more functional independence. Below is a snapshot of our most recent patient outcomes.

Top Diagnosis Treated

Who we serve - Top diagnoses treated at the MemorialCare Rehabilitation Institute

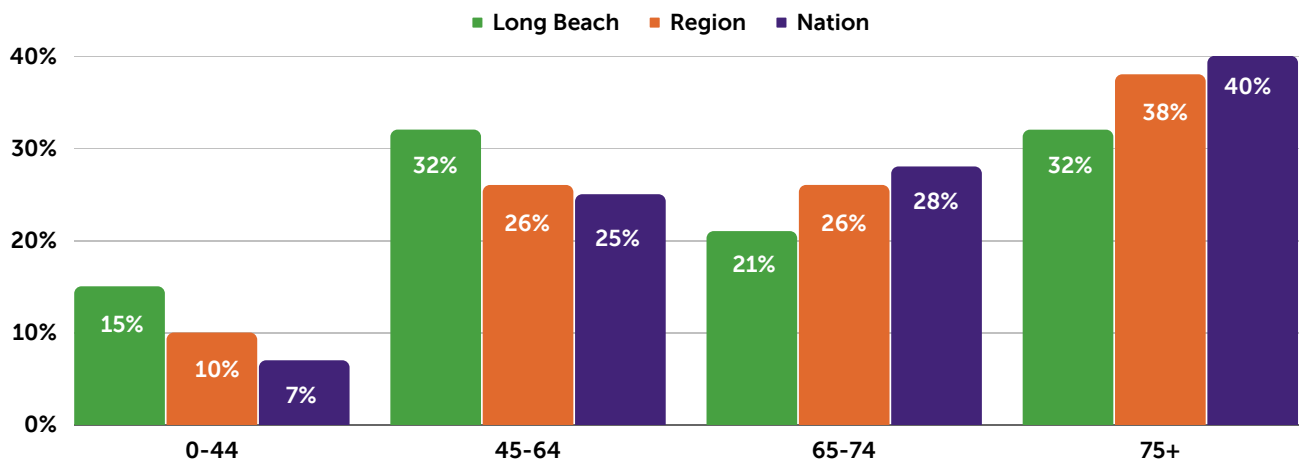

In 2022, 69% had neurological impairments, such as stroke, spinal cord injury, brain injury or other neurological conditions.

454 total patients were treated at the MemorialCare Rehabilitation Institute at Long Beach Medical Center in 2022.

Who we serve - Demographics

The MemorialCare Rehabilitation Institute serves a greater population under the age of 65 years than other inpatient rehabilitation facilities in the region.

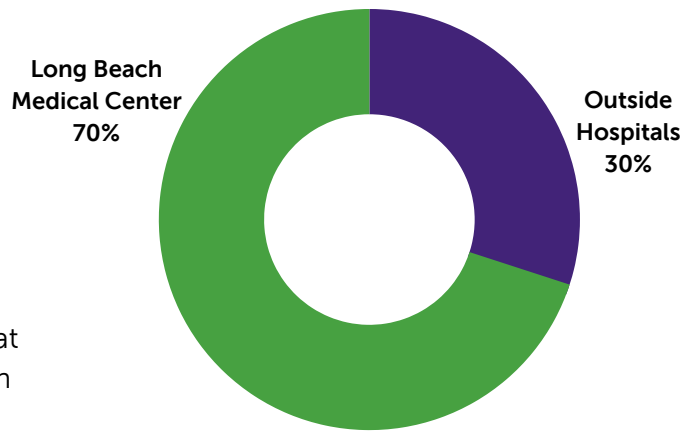

Percentage of Age Served

Where our patients come from

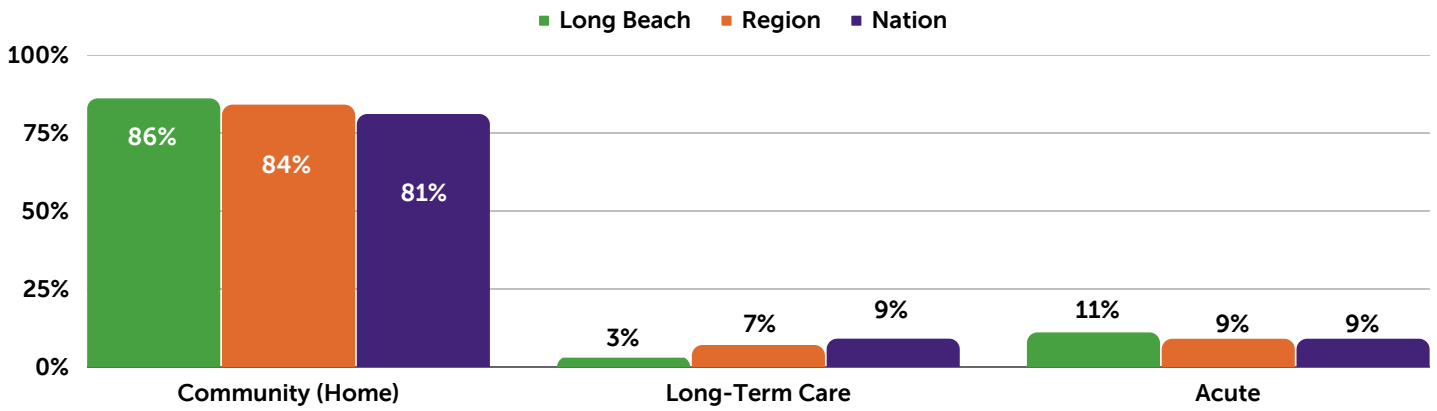

Often, our patients are transferred from other hospitals because they require a higher level of specialty care. Of our admissions, 30% come from hospitals outside of our own medical center.

Patients Transferred From

Most patients go home - not to a nursing home

We know that our patients' number one goal is getting back to their lives. At the MemorialCare Rehabilitation Institute, our therapists, nurses, and physicians have that same goal and will partner with patients to achieve it. In total, 86% of Long Beach Medical Center patients are discharged to their home and not a nursing home.

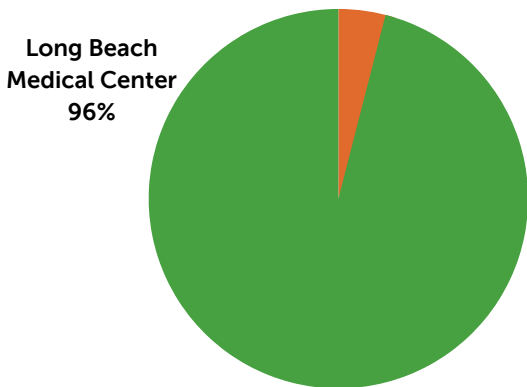

Excellent patient experience

96% of Long Beach Medical Center patients were satisfied with the services received during their rehab stay.

Satisfaction is based on Inpatient Rehab Facility MedTele outcomes data for 2022 (percentage of patients that agree or strongly agree).

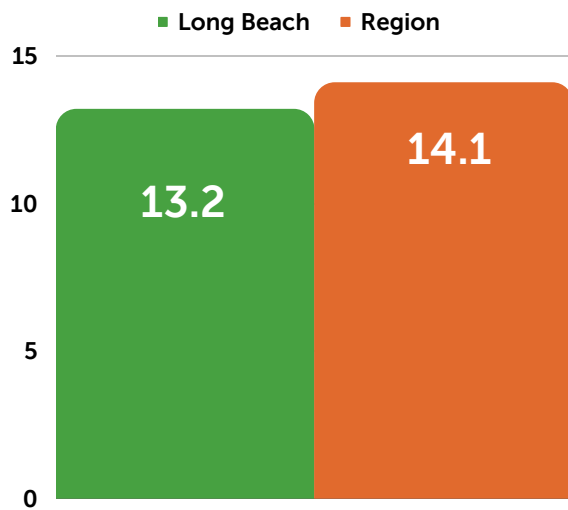

Satisfaction Rating

Average length of stay

Long Beach Medical Center averages 0.9 days less on length of stay than the national average.

Length of Stay (days/patient)

The MemorialCare Rehabilitation Institute at Long Beach Medical Center is accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF).
